```c
#include <stdio.h>

int main() {
    double distance, time, speed;

    // Input the distance in kilometers
    printf("Enter the distance between GLA University and Delhi (in
kilometers): ");
    scanf("%lf", &distance);

    // Input the time taken to reach Delhi in hours
    printf("Enter the time taken to reach Delhi (in hours): ");
    scanf("%lf", &time);

    // Calculate the speed
    speed = distance / time;

    // Display the calculated speed
    printf("The speed of the bus is %.2lf km/h\n", speed);

    return 0;
}
```
