```c
#include <stdio.h>

int main() {
    float basicPay, hra, ta, salary;

    printf("Enter the basic pay: ");
    scanf("%f", &basicPay);

    hra = 0.15 * basicPay; // HRA is 15%
    ta = 0.20 * basicPay;  // TA is 20%

    salary = basicPay + hra + ta;

    printf("Salary of the employee: %.2f\n", salary);

    return 0;
}
```
