```c
#include <stdio.h>

int main() {
    double tank_volume = 175.0;
    double drainage_rate = 25.0;

    double time_required = tank_volume / drainage_rate;

    printf("Time required to completely drain the tank: %.2f hours\n",
time_required);

    return 0;
}
```
